Varanasi, UP | utk87020@gmail.com | +91-9026034980 | <http://www.linkedin.com/in/utkarsh1999rai> | <https://github.com/UTkarsh87020>

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate with hands-on full-stack web development and database engineering experience, backed by two internships and multiple production projects. Proficient in responsive UI development with React.js and JavaScript, and RESTful backend services with Node.js and Express. Comfortable with MySQL, Git, and AWS. Eager to grow into a full-stack or frontend SDE role within a collaborative engineering team. I aim to enhance my skills in application development, system design, cloud technologies, and modern software engineering practices.

EDUCATION

B.Tech in Computer Science & Engineering

Aug 2023 – Aug 2026

Galgotias University, Greater Noida

Diploma in Information Technology

Aug 2019 - Aug 2022

Hewett Polytechnic, Lucknow

TECHNICAL SKILLS

Languages: Java, JavaScript

Databases: MySQL, SQL Optimization, Schema Design

Frontend: React.js, HTML5, CSS3, Responsive Design, DOM Manipulation

Cloud & Tools AWS, Git, GitHub, VS Code,

Backend: Node.js, Express.js, REST API Development

CS Fundamentals: DSA, OOP, Agile / Scrum, LeetCode

PROJECTS

FastTrack Delivery – Smart Logistics System

January 2026

Stack: HTML5 | CSS3 | JavaScript | Node.js | Express.js | Live

- Architected a full - stack logistics platform covering customer profiles, order lifecycle, driver assignment, and delivery tracking built end - to - end as a solo project.
- Engineered an AI route optimization engine using three algorithms: Nearest Neighbor Heuristic, Time Window Constraint Scheduling, and custom Hybrid Model - outperforming single - algorithm baselines in real - time path computation.
- Delivered a responsive, real - time dashboard with live order status updates, demonstrating full ownership of the frontend UI and backend REST API.

Dynamic Music Player Web App

November 2025

Stack: HTML5 | CSS3 | Vanilla JavaScript | Live

- Developed a browser native music player with full playback controls play, pause, skip, and a real - time progress bar using pure JavaScript DOM manipulation no external dependencies.
- Designed a mobile first responsive UI with fluid CSS layouts and smooth transitions, ensuring a polished UX across all screen sizes.
- Optimized event handling to minimize DOM re - renders, achieving low latency audio playback with no perceptible lag on entry level hardware.

INTERNSHIPS

Mecatredz Technology - Web Development Intern

Dec 2021 - Apr 2022

- Developed interactive, fully responsive frontend components for live client facing websites using HTML5, CSS3, and JavaScript, directly improving cross device user experience.
- Collaborated with senior engineers in Agile sprints to review, refactor, and modernize legacy codebases applying Git branching and pull request workflows throughout.
- Gained practical SDLC exposure from requirements and design through code review, testing, and client aligned delivery in a professional agency environment.

Reckon Software - Database Management Intern

Sep 2022 - Feb 2023

- Designed and maintained production MySQL databases for core business applications, enforcing referential integrity across complex
- Authored and tuned advanced SQL queries multi - table JOINS, correlated subqueries, and indexed lookups measurably reducing retrieval latency and improving application response times.
- Documented schema structures and query patterns to support team knowledge transfer and streamline onboarding.

CERTIFICATIONS & ACHIEVEMENTS

- Industrial Training Certificate** (Mecatredz Technology, 2022)
- AWS Cloud Certificate** (Eduskill, March 2026)

- Innocodeathon Finalist** (ITS College, 2024)
